ONE MAN KILLED !- The rumor that one man has been killed by the guns of a British cruiser is confirmed. A despatch from Augusta. Ga., says that a vessel was off Pensacola, Florida, at the time. The United States steamer Fulton went in search of the British assassins. 25 If this be true, why should not these British cruisers be 1 00 treated as pirates? They attack our vessels in a time 4 00 of profound peace; kill our seamen and yet shield themselves under the cloak of diplomacy. If we condescend 1 00 to argue with England about this matter where shall we 2 00 be? Why, in the position of the redoubtable negro 1 00 who, upon being knocked down by another darkey, jumped up and valiantly declared that if his antagonist ever did that again he would hit him! There is no 2 00 course consistent with honor left us, but to demand a 1 00 direct answer from the British Government, and, in the meantime, return these outrages with all the punishment we have the power to inflict. How to Cool Water .- As warm weather will soon 1 00 be down upon as with all its fervor, and all cannot con-3 00 veniently get ice, we give the following as a good sub-1 00 stitute, which all who do not get ice would do well to try. The experiment is a cheap one. If it is desired to cool water for drinking in warm weather, and ice or three folds of coarse cotton cloth kept constantly wet. The theory of cooling water in this manner is the absorption of heat from it by the evaporation of the moisture in the cotton cloth-expansion produces cold; compression heat.—Nash. News.
